

3) MVS YARNS (MURATA VORTEX SPINNING)

MVS yarns are produced by VORTEX spinning system manufactured by MURATA.

Contrast to ring spun yarns, MVS yarns do not require cross-knitting of S-yarn nor Z- yarn when producing a premium fabric because the needle lines skew much less.

Its pilling grade of 3 or above allows MVS yarns to satisfy the increasing expectations of a variety of customers.

MVS yarn provides better moisture-absorbent aspect and faster drying rate than ring spun yarns.

Adry touch of the yarn is ideal for sports and active wears as well.

We at shivansh Inc provides a various kinds of MVS yarns such as blended yarn, neppy yarn, and synthetic yarn in different counts as per the need of consumer

WE OFFER FROM THE WORLD LARGEST MVS YARN MANUFACTURER WHICH IS KNOWN FOR EXCELLENT QUALITY AND COMPETITIVE PRICES.

COUNTS	COMPOSITIONS
1/10s - 1/50s	A) 100 %POLYESTER
	B) POLYESTER/VISCOSE 65/35,50/50, 90/10
	C) MELANGE(12 %,30%, 50%,)

2) SIRO COMPACT spinning

Siro spun yarn is a virtual - two-fold yarn in which the two components are untwisted strands rather than twisted singles yarns. This Yarns Can Be Used Directly into Warping without any need to sizing the yarns for making fabrics and that is being used on high speed looms and knits machines.

The yarns from siro compact spinning technology make the fabric smooth without hairiness and soft and comfortable, it can be used all kinds of outerwear suit fabrics, trousers and skirts fabrics

We are constantly improving ourselves to provide range of products in siro compact spinning with new improved blends and value added customization as per need of our clients.
